Subject: TESTIMONIAL FOR BIRMINGHAM FOUNDATION SYSTEMS

To: Whom it may concern.

In my capacity as Project Manager, after a competitive tender I recently contracted Birmingham Foundation Solutions to carry out piling for the foundations on our Contract Management project at Princess Anne Public School, in Sudbury.

The project involved an addition more than doubling the school size. The combination of weak soil conditions with multiple floors of structural masonry and prestressed slab construction, warranted the need for a pile foundation that would found on varying bedrock conditions up to 25m below grade.

We found Birmingham led by their experienced personnel easy to work with, and adaptable to changes. Birmingham offered solutions to varying geotechnical conditions on more than one occasion to the advantage of the project schedule and overall budget.

We were forced to drive piles immediately next to existing classrooms and the school remained open for the duration of the work. This required creative scheduling which Birmingham showed the utmost flexibility with. Birmingham also proved to be highly sensitive to safety for all the school staff and students.

In closing, we trust this information becomes useful in your selection process. Please do not hesitate to contact me should you require more specifics.

Best regards,

Malcolm Burdon
