Birmingham Foundation Solutions

**Attention: Andrew Weltz. P. Eng**

**Re: Keswick - Elevated Water Storage Tower  
Fergus – Elevated Water Storage Tower**

Landmark Structures has had opportunity to retain Birmingham on two projects in the past year requiring deep foundations, both in Fergus and Keswick, Ontario.

We appreciate that Birmingham's project management staff approach each project in a professional, courteous and organized manner, keeping the client well informed of project status throughout completion. When encountering unforeseen site conditions their staff worked with our field and engineering staff as a team to resolve issues quickly in order to minimize any extension to project schedule.

We would highly recommend Birmingham for any deep foundation project and look forward to our next opportunity to work with them

Sincerely,

LANDMARK STRUCTURES CO.
