Attention: Mr. Andrew Weltz, P.Eng.  
Project Manager

Dear Andrew:

**Re: Metrolinx – Black Creek and Black Creek Drive Widening**

---

We want to thank Birmingham for their innovation on the Black Creek Drive project. From start to finish Birmingham lead the way by understanding the client's concerns and offered effective engineered solutions. This process started with concepts that were presented through 3-D models and finished with engineered noise abatement and shoring systems that addressed the social, economic and schedule challenges on this project.

I look forward to my next opportunity to work with Birmingham and would have no problem recommending them for any project regardless of the level of difficulty.

Sincerely,

**Dufferin Construction Company**  
**A division of Holcim (Canada) Inc.**
