**Attn: Andrew Wertz, P.Eng  
Project Manager**

**RE: Six Nations Water Treatment Plant, Six Nations Ontario, Canada**

Mr. Wertz,

I would like to take a moment to thank Bermingham for their outstanding effort on the Six Nations Water Treatment Plant Pile project. The project was completed on time and within our budget. Throughout the course of the project Bermingham operated with a high level of professionalism when dealing with our office staff and other local subcontractors respecting our native culture.

Bermingham has continued to maintain a positive relationship with this office after the completion of the original contract by way of providing insight into challenges that exist on upcoming contracts. During the planning stage for the intake structure Bermingham was able to leverage their local experience and provide relevant contract drawings for the adjacent bridge that was constructed for the Six Nations of the Grand River Band back in 1982. This experience was critical in assessing the potential impact that the new construction would have on the adjacent bridge.

I look forward to maintaining a positive working relationship with Bermingham and would have no issue recommending them for future projects.

Sincerely,  
**First Nations Engineering Services Limited**

Justin Gee, P.Eng., MCIP RPP  
Vice President
