RE: GTA Pipeline Project – Toronto, ON

On behalf of Michels Canada, I would like to thank the shoring crews, design personnel, and management team at Birmingham for their efforts in contributing to the overall success of the GTA Pipeline Project.

The GTA Project featured elements that required flexibility and innovation from all parties; the commitment of dedicated personnel, fully integrated within the Michels project team, allowed you to provide valuable input, and quickly react to the highly dynamic nature of the project. Of special note, and thanks, to Jeff Thompson, and Brent Porteous for their pivotal involvement in the project.

Michels and Birmingham have previously worked together on projects, and while the scope and scale have varied, the overall results have not; as such I look forward to the next opportunity to continue this successful working relationship.

Sincerely,

Bill Gavinchuk, P.Eng
Project Engineer
Michels Canada Co.
