

BERMINGHAMMER

FOUNDATION EQUIPMENT

SAV

Stand Alone Valve for Bermingham Systems

The Stand Alone Valve Allows the Use of Bermingham's Time Saving VTL System with Most Vibro Power Packs

Each valve's maximum pressure can be independently set up to 5075 PSI (350 BAR)

Easy Use Controls

Bermingham's SAV controls are joystick operated and can be installed in the cab of the crane for the crane operator. They offer full proportional control of all auxiliary and VTL functions.

Hydraulic Power Requirements

Standard Flow

- 70 GPM (265 l/min)
- Can power Bermingham's VTL System and drills

Heavy Duty High-Flow

- 160 GPM (605 l/min)
- Can power Bermingham's VTL System and drills
